How to Download Images in Canva

When you're ready to use the social media image templates, Canva will require you to create an account to download the images. It's simple to sign up and use -- just follow the instructions from Canva.

Once your account is created, you can access and download the templates.

How to download and save an image

Whether you've customized the images or just want to use a standard version, downloading them for your own personal use is simple. Here's how:

1) In the top right corner, click the "Download" button. A menu will appear.
2) In the "File Type" drop down, select "PNG".
3) In the "Select Pages" dropdown, **unselect** "All Pages".
4) Select images that you want to download by checking the box next to them.
5) Hit "Done".
6) Hit "Download".

You've successfully downloaded your image/s!
